

Darcy (Morning Sun's Moment of Insanity JH)

So four days after Deacon was born, I went and picked up Darcy. Hence, her registered name, but I've never regretted getting her. She's been an absolute joy to be around and train. Quite and gentle in the house and an incredible work monster when she's outside. Every day for her is the greatest day EVER, and if there is a ball involved with it... Well, words can't describe what it means to her! When she was 10 months old, I nearly lost her to a brain infection caused by Toxoplasmosis (a parasite carried by cats and many other animals in their feces). I can't thank Bush Veterinary Neurology group enough for saving her life. She's completely normal and well on her way to being an outstanding SAR dog for me.

Her favorite thing to do in her spare time is cultivate her air of intellectual superiority and quietly lord it over the rest of us peons.
